

Task: Create a Self-Managing Team for Boston CAD

Purpose:

To develop a living experience of a self-managing process with a developmental approach as change agents

In a way that creates a simultaneous actualizing and potentializing experience in regard to our community gathering with regulars and visitors

So That the ableness of each member to produce and evolve is made available in organizations beyond our community for self-organizing.

Products

Clarity of roles that accelerate our work and Work
A Being Body for our community is initiated
Community leadership experience to the entities beyond our own individual work

Process

Utilize a concrete version of a pentad that is effective for managing a whole
Carol works as a developmental session with this framework and likely others. Using Zoom.

Functioning Capability

Imaging the working of community, particularly that of a learning and creative community
