We are an oral school! Our materials do not transform and evolve being when offering as static non-engaged material. And it is even worse when modifying the material to make it accessible. (A Influences.) The value in the ideas are in activating consciousness, not particularly success or a better life. There tends to be benefits to life, but the long term, transformation comes from non-mechanicalness and waking up to consciousness, (B influences) not specific practices that can be taught. That is why the semantic materials and epistemology are necessary for them to work with people.

Nature of Engagement ***** Audience	Material- the work itself	Process Pattern- the Way we work, design, and source	Structure for development- the way we ensure infrastructure is Dev.
